COACHBUILDER INFORMATION UPDATE

Date: January 17, 2013
Bulletin Number: XTS 15
Subject: Emissions RPO codes

This bulletin is to inform you of important information related to emissions when ordering Incomplete (V4U, B9Q, and W30) Cadillac XTS Chassis. *This notice is simply a reminder as the process is similar to the DTS ordering process.*

When ordering incomplete chassis that could be sold in California or the northeast region of the United States, coachbuilders/ordering dealers will need to include the emissions RPO code: NE1 (for the N.E.) or YF5 (for California). If your ordering dealer is not located in either of these areas, they will also need to include RPO code: NC7 as an override code.

If you have any questions or concerns, call Joe Pennington at (248) 808-0854.
